Brand Update

The recent pandemic brought up many issues which forced us to take a step back and review who we are, where we've come from, where we are now and where we want to go in the future and it's clear; what's got us where we are today, won't get us where we're going!

Founded by a desire for better, Gill has been at the forefront of marine apparel for over 45 years. Creating the most technical sailing clothing to protect people from the elements while out on the water, giving them the confidence to go anywhere, in any condition and accomplish their goals.

In order to move forward we need to diversify and expand our reach. That doesn't mean we abandon our core sailing audience - they still remain a big part of our business but our products are not limited to just sailing. They can be used across the board for other water based and outdoor activities.

Our priority remains the same – we will continue to create the most technical apparel. However, the audience focus has to shift so that our products become more inclusive and accessible to enable people to be active on, off and around the water. Allowing them to discover more, to explore further and to challenge their limits.

Water is what connects us to everything we do. From our beginnings as a brand, to the products we create. It's always been about empowering people through engineered, technical clothing and equipment so they can experience moments and tell stories of their achievements.

For all of us who are bound by water. It's time we share our products with more people.

Sustainability

In 2020 we first outlined details of our sustainable efforts, acknowledging that we aren't perfect and our journey was only just beginning. Since then we've made considerable progress, where each decision we make is a reflection of our commitment to creating the best technical products we can, whilst reducing our impact on the environment.

From a materials point of view we are now using more fabrics made from recycled fibres or using lower impact alternatives. In 2022 we released the latest edition of the OS2 offshore system, proving that performance and technology don't need to be sacrificed when it comes to creating and manufacturing sustainable technical clothing.

Our commitment to change isn't just limited to our products, we look at all aspects of our business and supply chain and we are pleased to share that we have now achieved 'Carbon Neutral' international standard. We are also now part of the United Nations Climate Neutral Now initiative and will report on our progress on an annual basis.

We want to be transparent about our progress so far, as we know it's important for our customers and consumers to be able to make informed choices. As we move forward, we are focussed on how we can do better to respect the planet and its people, source more responsible materials for our product, and improve the way we manufacture within our supply chains.

22%

of Gill styles are now free from plastic packaging

33%

A third of our latest collection features recycled or plant-based content

75%

reduction in wetsuit packaging materials

Our recent achievements and pledges:

Helping us to Measure, Reduce and Compensate

- Officially achieved 'Carbon Neutral' International Standard
- Verified our Carbon Footprint with the assistance of an external auditor
- Identification of carbon reduction measures
- Compensation for unavoidable emissions through the use of Carbon Credits

United Nations initiative helping organisations achieve Climate Neutral status.

- Climate Neutral Now Pledge signed
- First year reports submitted detailing actions and achievements
- Progress report on an annual basis

SINGLE
USE
PLASTICS
PROJECT

European Outdoor industry initiative

- Commitment to eliminate or reduce the use of single use plastics
- All plastic packaging now made from recycled content and is fully recyclable
- Trialling alternatives including paper-based packaging and water-soluble polymers

Fabric Technology & Performance - Waterproofs

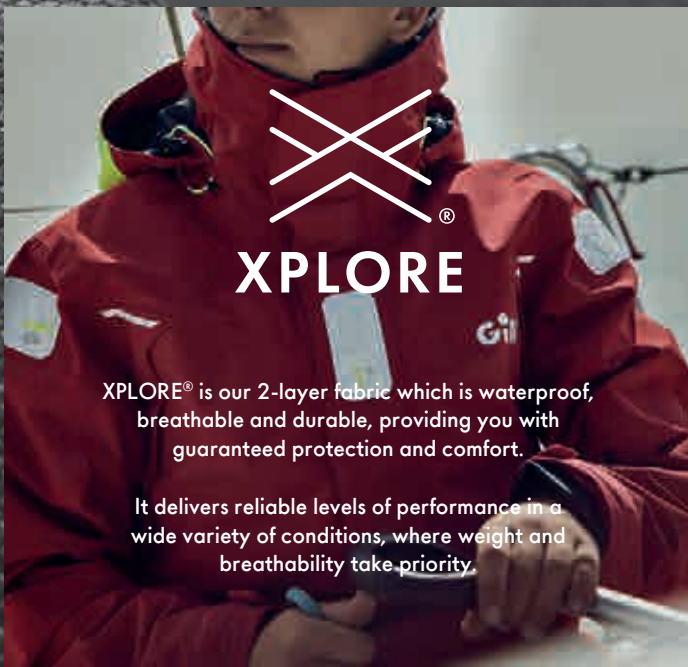

Rather than relying on branded fabric solutions or generic fabrics developed for non-marine conditions, we've taken a different path and invest in more fabric development and testing than any other Marine brand.

Our fabric branding architecture explains the differences between our waterproof fabric technologies as well as giving us an ownable identity.

The naming hierarchy clearly distinguishes our 2 and 3-layer fabric technologies and goes across both our sport and lifestyle ranges.

For further guidance our quick-reference scales present levels of performance and explain our fabric technologies, so that consumers can easily identify which garment best meets their needs. This system allows us to share the data directly with the consumer; as well as explaining the differences between XPLORE® and XPLORE+®, it presents the garments level of Waterproofness, Breathability and Durability.

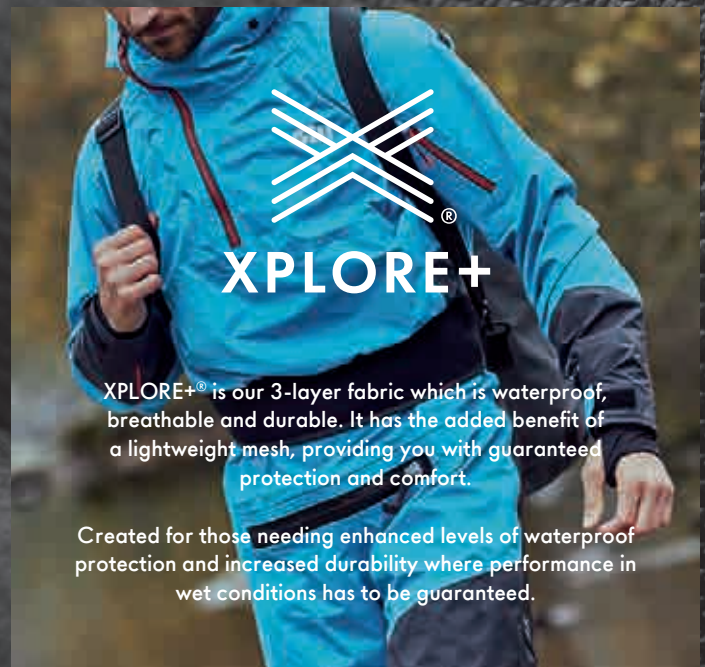

This information can be found on swing tickets, our website and is shown against each product within this guide where relevant.

XPLORE

XPLORE® is our 2-layer fabric which is waterproof, breathable and durable, providing you with guaranteed protection and comfort.

It delivers reliable levels of performance in a wide variety of conditions, where weight and breathability take priority.

XPLORE+

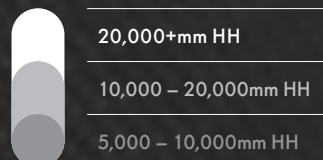

XPLORE+® is our 3-layer fabric which is waterproof, breathable and durable. It has the added benefit of a lightweight mesh, providing you with guaranteed protection and comfort.

Created for those needing enhanced levels of waterproof protection and increased durability where performance in wet conditions has to be guaranteed.

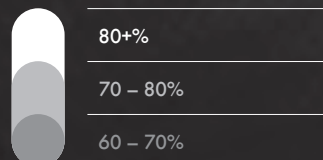

Each garment has been rigorously tested to ensure it meets our stringent performance standards. A rating system has been created to indicate how each garment performs.

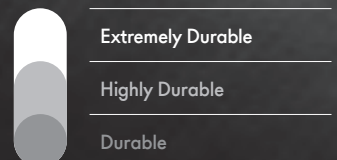

Waterproofness

Breathability

Durability

For 2022 we're adding our revolutionary plant-based fabric finish, XPEL®, to even more products! Now applied to all of our high performance waterproof styles, adding an extra level of protection for those who need it most.

XPEL® offers our consumers incredible levels of water repellency; water simply rolls off the outer fabric without a trace, even saltwater which has a lower surface tension and can easily 'wet out' waterproof fabrics. The finish is stain resistant too and will repel grease, mud and oil – even ketchup and red wine can simply be rinsed away. XPEL® also naturally controls odours in a safe and effective way, so fabrics remain fresh even when stored wet.

XPEL® delivers this outstanding moisture repellency, stain resistance, stain release and odour resistance without changing the comfort, hand feel, or breathability of our waterproof fabrics. Each fibre of the outer fabric is coated with XPEL® during the fabric manufacturing process, resulting in a durable and long-lasting finish. We guarantee consistent levels of performance for up to 30 washes, with the treatment continuing to be effective for up to 50 washes.

For further details on XPEL® visit gillmarine.com/xpel

Fabric Technology & Performance - Neoprene

Neoprene icons explained

X4 Flex Technology

- Ultraspan underarm and side flex panels that allow complete freedom of movement.

Power TXCOAT

- High abrasion resistance rubber coated Neoprene panelled on key wear areas.

Glideskin

- Low-friction glideskin seals offer warmth and comfort against the skin and protection from chaffing.

Di-Guard

- The high tenacity Di-Guard Neoprene panels protect against wear generated through contact with the boat. Strategically placed to resist abrasion and prolong the life of your suit.

FireCell Technology

- The FireCell air technology is a complex 3D structure of Neoprene and works on the principle of trapping air space.

Helioflex

- Water Repellent, high stretch thermal fabric.
- Dries quicker than standard plush and has an incredible thermal quality.

Thermal Protection Technology

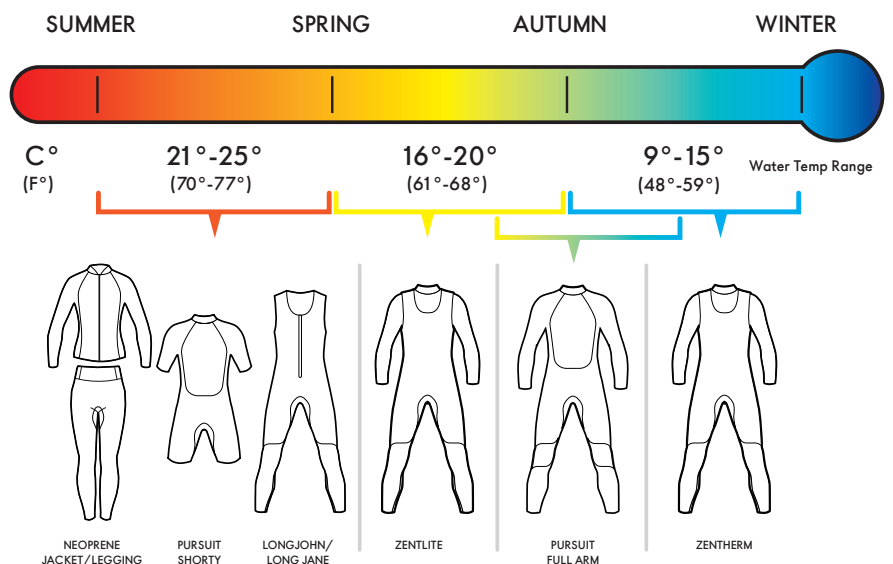

- Strategically placed thermal plush inner panels to trap body warmth.

We have been using Neoprene for many years, mostly in our wetsuits designed for dinghy sailing. In recent years we have expanded our range of Neoprene products as more and more consumers are now getting out on the water for a range of water activities.

Our Neoprene collection ranges in thickness and style, giving consumers choice and flexibility. The guide to the right offers further guidance as to which Gill style is right for the consumer in terms of seasonality.

NEOPRENE USAGE GUIDE

* FOR REFERENCE ONLY: The product required will depend on many factors including body type, level of activity, and the outside temperature. ZENTLITE / ZENTHERM guidance given based on wearing full outfit

US Sailing

In early 2022 we announced a multi-year partnership with US Sailing and the US Sailing Team as their Official Technical Apparel Partner.

Known for our long-standing history in developing innovative clothing for both dinghy and big-boat sailing, the partnership secures the expectations and high-performance demands required by the US Sailing Team and its athletes.

The US Sailing Team is very much focused on the 2024 Summer Olympic Games in Paris and we're excited to support them on this journey and gain important insights and feedback as to what top athletes require from their performance clothing.

US Sailing's mission is to serve the entire spectrum of sailors in the United States; from community sailing to cruisers, racers, and Olympians.

As sailing continues to evolve, so must the equipment on which participants rely, and Gill and US Sailing will be at the forefront developing new technologies together.

US Sailing Team

The US National Team, which is selected annually, comprises the top sailors competing in the events selected for the Paris 2024 Olympic Games. The roster is assembled from qualification at the World Championship.

There were ten sailing classes at the Tokyo Games, including windsurfing, mixed Nacra 17 foiling, 49ers and the 470. The various sailing disciplines are constantly changing and the boats allowed to compete are designed to be increasingly smaller and lightweight, placing ever greater demands on both the athletic and technical capabilities of the sailors. Of the new events which will take place for the first time in the 2024 Paris Olympic Games are IQ Foil (foiling windsurfing) and Kiteboarding.

These intensely physical classes put a higher demand on the athletes and their equipment. Gill and the US Sailing Team will be working together with the athletes to ensure they have the most innovative gear designed for the demands of each discipline.

Introducing some of the US Sailing Team athletes competing in these new classes:

PEDRO PASCUAL / IQ FOIL (FORMERLY RS:X)

Like many sailors, Pedro got his start in Optimist dinghies at age 8. However, he quickly came to realise that he liked faster boats. While living in Spain at age 12, Pedro and his dad started windsurfing. He began competing in the windsurfer when his family moved to Saudi Arabia and continued when they relocated to Miami, Florida. Pedro joined the US Sailing Team at age 20 and finished in 28th place at the 2016 Rio Olympics. Since then he has steadily improved, winning Silver at the 2019 Pan American Games and Gold at the 2020 Hempel World Cup Series Miami.

iQ Foil (formerly RS:X)

DANIELA MOROZ / FORMULA KITE

Born and raised in the San Francisco Bay Area by windsurfing parents, Moroz learned to kite at age 12 and began competing internationally at age 14. She sailed her first World Championship at age 15, won her first world title only a year later at age 16, and has since then taken the kiting world by storm, winning five consecutive World Championships.

Formula Kite

MARKUS EDEGRAN / FORMULA KITE

Markus began his diverse sailing career at age 8 in the Opti and found racing at age 10. After Optis, he built his foundation in traditional sailboats across the 420, FJ, and ILCA classes before sailing 420s and FJs at St. Mary's college of Maryland. In 2018, Edegran began his journey in kitefoil racing and officially committed to the discipline in 2019 with sights set on qualifying for the Paris 2024 Games.

Marine Sport

Marine Sport is designed especially for the consumer that expects highly technical product that will perform in the toughest of conditions. Our DNA lies in technical performance and we know how important trust and authenticity are to our Marine Sport consumers. These products are the ones that need to deliver the very highest level of performance, across a wide variety of activities and environmental conditions.

Our Marine Sport category is a precise blend of constant evolution and new product innovation. Our product developers and designers collaborate with athletes, pioneers and adventurers to create progressive, technical solutions. Every line is put to the test in the lab and pushed to the limits out on the water.

OS SERIES: WHATEVER YOUR WATER

The OS Series is our tiered system of waterproof sailing clothing that lets you take to the water with confidence. From relaxed coastal trips to the more extreme crossing of oceans, our systems have been designed to meet your specific needs and conditions, whatever your water! Now all featuring XPEL® technology, for added protection.

OS1 OCEAN JACKET OS13J

Technology:

- XPLORE+® 3-layer waterproof and breathable fabric
- XPEL® water and stain repellent treatment
- High performance, durably waterproof and breathable

Features/Benefits:

- Ocean height collar with a concealed, wrap-around face guard
- Thermal brushed mesh inner collar and chin guard
- Abrasion resistant panels to protect against wear and tear
- Photoluminescent safety reflectors
- 2-way zipper protected by a double storm guard
- Deep cargo pockets with secure closure and hand warmer pockets behind
- Chest hand warmer pockets
- Adjustable outer cuff with hi-vis PU inner seals for watertight comfort and increased visibility
- PLB attachment point
- Security pocket protected by a YKK Aquaguard zipper
- Shackle tool included

Fabric Composition:

- Shell: 100% Nylon
- Panel: 100% Polyester

Marine Lifestyle

Our Marine Lifestyle category takes everything we've learnt as a technical brand, but has an emphasis on comfort and modern styling. Taking inspiration from marine culture and life on the water, but with an element of performance to make them even more wearable as part of an active lifestyle. These multi-use garments reflect the fact that we have a diverse global community with a passion for exploration – on, off and around water.

- Waterproof and breathable
- Thin enough to be worn inside boots and performance footwear

Fabric Composition:

- Outer: 80% Nylon, 20% Elastane
- Inner: 95% Polyester, 5% Elastane

Colour: Graphite. Sizes: S-L

EYEWEAR

Glare-free vision

Polarized lenses block the glare produced by light reflecting off the water or bright deck surfaces which can create a distracting haze; a real issue when you're looking for marker buoys or checking sail trim. Optically-corrected, shatter-resistant cushion elements are laminated to both sides of the UV absorbers, followed by a unique scratch resistant coating applied to the outer surfaces.

Natural colours

Filter category 3 lenses allowing 8-18% light transmission and are useful in bright sunlight, driving and general purpose wear.

100% UV400

UV light absorbers, which block 100% of harmful UVA, UVB, and UVC radiation.

Reduced eye fatigue

A quality optical lens is used to prevent vision distortion as cheaper lenses bend and misdirect light so that sizes, shapes and even distances can become distorted – leading to eye strain as you're forced to compensate. They comply with European Class 1 Optics Standards.

Floatable

Designed for life on the water, all Race and Performance sunglasses float.

Hydrophobic

Hydrophobic outer coating sheds water and reduces salt residue for clear vision.

Oleophobic

Oleophobic technology applied to the inside face repels fingerprints, sun lotion and skin oils. This is the same technology found on touch-screen devices to reduce finger marks.

VERSO SUNGLASSES 9740

All of our garments are sized and fitted with end use in mind, we have defined our different types of fit here. Products not labelled as one of our other specific fits will be a regular fit.

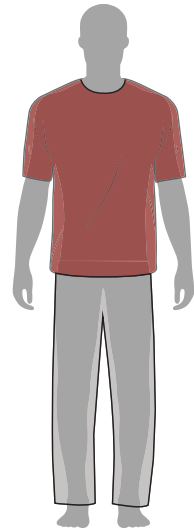

Next to Skin
Follows the contours of the body giving freedom of movement.

Slim Fit
Closer fit, giving a silhouette that skims over the body.

Regular Fit
Neither close fitting or oversized, designed to be versatile and fit as expected for the products' intended end-use.

Relaxed Fit
Cut looser with more room around the body. Ideal for layering over other pieces.
